Cookie Policy

1. Introduction

This Cookie Policy explains how [Hungora Private Limited] ("Hungora", "we", "us") uses cookies and similar technologies on the Hungora website, mobile apps and partner dashboard (the "Platform"), and the choices you have.

It forms part of, and should be read with, the [Hungora Privacy Policy] and [Terms of Use]. Capitalised terms not defined here, such as Reservation, Takeaway Order, Partner Restaurant and Data Principal, have the meanings given in the Privacy Policy.

Where a cookie or similar technology collects personal data, Hungora processes it as Data Fiduciary under the Digital Personal Data Protection Act, 2023 and the DPDP Rules, 2025.

2. Cookies and similar technologies

- **Cookies** are small text files a website stores in your browser. **First-party cookies** are set by Hungora on our own domain. **Third-party cookies** are set by another company, such as an analytics provider, while you are on our site.
- **Session cookies** are deleted when you close your browser. **Persistent cookies** stay for a set period so we can recognise your browser on a later visit.
- **Local storage and session storage** let a website or app save information on your device, for example the city you selected or an unfinished booking.
- **Pixels** (also called web beacons or tags) are tiny pieces of code in a web page or email. They tell us or a partner that a page was viewed or an email was opened.
- **SDKs** (software development kits) are code from a partner built into our apps. They work like cookies inside an app, for example to report crashes or measure feature use.
- **Device identifiers** include the advertising ID on Android or iOS and app-instance IDs. Some SDKs use them to recognise your device.

In this Policy, "cookies" covers all of these unless we say otherwise.

3. Legal basis and consent

We use strictly necessary cookies to provide the service you ask for, such as keeping you logged in while you book a table. Every other cookie category is used only after you consent.

3.1 The cookie banner

On your first visit to the website, we show a banner before any non-essential cookie loads. It offers:

- **Accept all** and **Reject all**, with equal size and prominence;
- **Manage preferences**, which opens a toggle for each category in Section 4, all switched off by default;
- a link to this Policy and the Privacy Policy.

Closing the banner, scrolling, or continuing to browse does not count as consent. If you reject optional cookies, you can still search restaurants, book tables, place Takeaway Orders and pay.

3.2 In the apps

The apps ask for the same choices during onboarding and in **Profile → Privacy & Consents**. On iOS, we also show Apple's App Tracking Transparency prompt before any SDK accesses your advertising identifier. If you decline either, advertising SDKs stay off.

3.3 Recording and refreshing consent

We store your choices in the hg_consent cookie and, if you are logged in, in your account, so your choice follows you across devices. We keep a log of the choice, the policy version and the time. We ask again every [12] months, or sooner if we add a new purpose or a new third party.

4. Cookie categories

Hungora groups cookies into four categories, each tied to a specific part of the service.

Category	What it does on Hungora	Consent needed?
Strictly necessary	Keeps you logged in; secures login, OTP and checkout against fraud and bots; holds a Reservation slot or Takeaway cart while you finish; remembers your cookie choices; balances server load	No
Functional	Remembers your city, language, saved filters, recently viewed restaurants and preferred party size	Yes
Analytics	Measures which search, booking and pickup steps work or confuse users; reports app crashes; supports A/B tests of new features	Yes
Advertising	Measures whether Hungora ads on other sites led to a booking or order; shows Hungora ads to people likely to be interested	Yes

We do not use cookies to profile your health, religion, finances or other sensitive traits, and we do not infer them from your dining choices or special requests.

5. Cookies we use

This table lists the cookies on hungora.com as of the date above. We review it every [6] months and whenever we add a tool.

Cookie	Provider	Purpose	Duration	Category
hg_session	Hungora	Keeps you logged in	Session	Strictly necessary
hg_csrf	Hungora	Protects forms such as booking and checkout from forgery	Session	Strictly necessary
hg_consent	Hungora	Stores your cookie choices	12 months	Strictly necessary
hg_cart	Hungora	Holds your Takeaway cart or in-progress Reservation	24 hours	Strictly necessary
_GRECAPTCHA	Google reCAPTCHA	Blocks bots on login, OTP and checkout	6 months	Strictly necessary
hg_city	Hungora	Remembers the city you selected	12 months	Functional
hg_prefs	Hungora	Remembers language, filters and recently viewed restaurants	12 months	Functional

_ga	Google Analytics	Distinguishes visitors for traffic statistics	13 months	Analytics
_ga_[ID]	Google Analytics	Keeps session state for analytics	13 months	Analytics
_fbp	Meta	Measures Hungora ads on Facebook and Instagram	90 days	Advertising
_gcl_au	Google Ads	Measures conversions from Google ads	90 days	Advertising

We set Google Analytics with IP anonymisation and data sharing with Google products turned off, and we cap its cookie lifetime at 13 months.

6. App SDKs and device identifiers

Our Android and iOS apps use the SDKs below. Optional SDKs start only after you consent in the app.

SDK	Provider	Purpose	Data it receives	Category
Firebase Cloud Messaging	Google	Sends booking confirmations, Hold Timer reminders and pickup-ready alerts	App-instance ID, push token	Strictly necessary
Payment SDK	[Razorpay / Cashfree / PayU]	Processes payments in the app	Order amount, device data for fraud checks	Strictly necessary
Google Maps SDK	Google	Shows restaurants near you and directions	Location, only if you allow it	Functional
Firebase Crashlytics	Google	Reports crashes so we can fix them	Device model, OS version, crash trace	Analytics
Firebase / Google Analytics	Google	Measures feature use and the booking and ordering funnel	App-instance ID, in-app events	Analytics
Meta SDK	Meta	Measures app installs and orders from Hungora ads	Advertising ID, in-app events	Advertising

We do not use SDKs to read the list of apps on your phone, your contacts or your SMS. You can reset or limit your advertising ID in **Android Settings → Privacy → Ads** or **iOS Settings → Privacy & Security → Tracking**.

7. Third parties

Third-party providers that set cookies or run SDKs on our Platform act as our Data Processors under contract. They may use the data only to provide their service to Hungora, except where they act independently under their own privacy policies as described below.

- **Partner Restaurants** do not place cookies or trackers on the Hungora Platform. Restaurant pages, menus and booking widgets are served by Hungora.
- **Payment pages.** When you pay, our payment aggregator's checkout may set its own strictly necessary cookies for fraud prevention. These are governed by the aggregator's privacy policy: [link].
- **Social sign-in.** If you choose "Continue with Google" or another sign-in option, that provider may set cookies under its own policy. We receive only your name, email and profile photo.
- **Embedded maps and videos.** Google Maps or YouTube content may set cookies when it loads. We load them only after you allow functional cookies, or when you tap to open the map or video.
- **Advertising partners** such as Meta and Google may combine data from our cookies with data they hold about you, under their own policies. You can manage this in their ad settings as well as ours.

Provider policies: Google, Meta, [payment aggregator — link].

8. Managing your choices

You can change or withdraw your cookie consent at any time, as easily as you gave it.

- **Website:** select **Cookie settings** in the footer of any page to reopen the preference centre.
- **App:** go to **Profile → Privacy & Consents**.
- **Browser settings:** you can block or delete cookies in your browser. Help pages: Chrome, Firefox, Safari, Edge.
- **Global Privacy Control and Do Not Track:** if your browser sends either signal, we treat it as "Reject all" for analytics and advertising.
- **Consent Manager:** once Consent Managers registered with the Data Protection Board are operational, you may manage your Hungora consents through one of them.

When you withdraw consent, we stop setting those cookies, delete the ones we control from your browser, and tell the relevant providers to stop processing for that purpose. Withdrawal does not affect processing that happened before it.

If you block strictly necessary cookies, login, booking and checkout may not work. Your choices apply per browser and device unless you are logged in.

9. Lifespans, retention, localisation and children

Lifespans. No Hungora cookie lasts longer than 13 months. Durations for each cookie are listed in Section 5.

Retention of cookie data. Analytics data linked to a cookie or device ID is kept for [14] months, then deleted or aggregated. Advertising measurement data is kept for [90] days. Consent records are kept as set out in the Privacy Policy retention schedule.

Where data is stored. Data from Hungora's own cookies is stored in India. Some third-party providers, such as Google and Meta, may process cookie data outside India. We use them only under contracts that protect the data and never in a country the Central Government restricts under Section 16 of the DPDP Act.

Children. Hungora is for users aged 18 and above. We do not knowingly set analytics or advertising cookies for anyone under 18. If a logged-in account belongs to a minor using it with parental consent, we turn off analytics and advertising cookies and SDKs for that account, as Section 9(3) of the DPDP Act requires.

10. Changes and contact

We update this Policy when we add, remove or change cookies or providers. If a change adds a new purpose or a new third party, we ask for your consent again through the banner or the app before using it. Past versions are available at [hungora.com/cookies/archive].

Questions about cookies: [admin@hungora.com]. Complaints: our Grievance Officer at [admin@hungora.com], as set out in the Privacy Policy. If you are not satisfied with our response, you may approach the Data Protection Board of India.

Effective date: [November 01 2026]. Version [1.0]
